PROJECTS

Profile Website of Associate Professor of IITA

<https://github.com/Ayushi181/ProfileManishSir>

- Developed a comprehensive website to showcase my profile as a college professor, facilitate student engagement using PHP ,HTML ,CSS ,Bootstrap and MySQL ensures a user-friendly and visually appealing interface.
- Created different sections to highlight academic qualifications, teaching experience, research expertise, projects and publications.
- The website can be accessed at <https://manishkumarwebsite.000webhostapp.com/home.php>.

Hotel Management System

<https://github.com/Ayushi181/HotelManagmentProject>

- The Hotel management System is a full stack Java application Project using JAVA ,MySQL ,DBMS concepts.
- Created a user-friendly interface for hotel staff to manage reservations, check-ins, check-outs, employee attendance, new employee registrations and room assignments.
- Integrated a centralised database to store guest information, payment details, employee details, employee attendance and room availability.

CV maker

<https://github.com/Ayushi181/CvMaker>

- Developed a robust resume maker application leveraging OOPs concepts , Java, and MySQL, enabling users to effortlessly create professional resumes.
- Utilised OOPs principles, such as encapsulation, inheritance and added export functionality to generate resumes in various formats (e.g., PDF).

Personal Website Development

<https://github.com/Ayushi181/ProfileWebsiteAyushi>

- Created a captivating and dynamic personal website using React JS, HTML, Bootstrap and CSS to showcase my skills, experience, and portfolio in an engaging and interactive manner.
- The website can be accessed at <https://ayushisingla.netlify.app/>
